

10' Instrument to USB Cable

IC-10U / 14419

NEW PRODUCT

Features & Benefits

Plug a guitar or bass directly into a USB input for use with podcast-recording software or a digital audio workstation. Our IC-10U Instrument-to-USB Cable provides the ease of plug-and-play set up as it is automatically recognized and configured when plugged into a Mac or Windows computer. The 10' cable provides plenty of length to enable freedom of movement, allowing you to focus on producing great audio.
