Deluxe Keyboard Tier

Z stand adapters

1. Remove plastic end caps from back of keyboard stand, and adjust width of KSA8500 to fit peg inserts into back of keyboard stand.
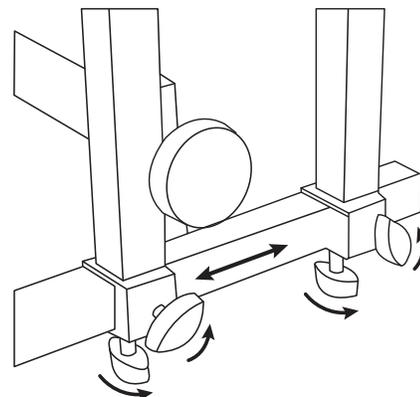

Note: If using a Z stand, remove plastic end caps from Z stand. Drill hole in stand to secure Z stand adapters with screw.
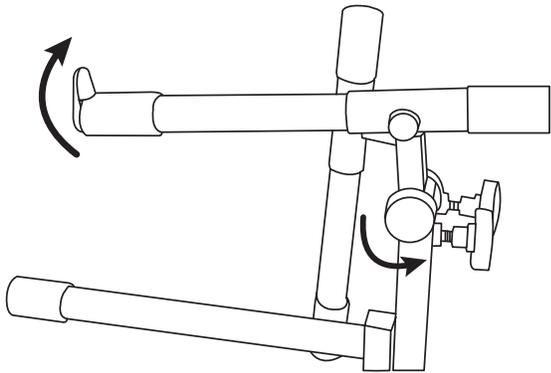

2. Insert KSA8500 into back of keyboard stand and tighten round knobs behind the inserts to secure KSA8500.
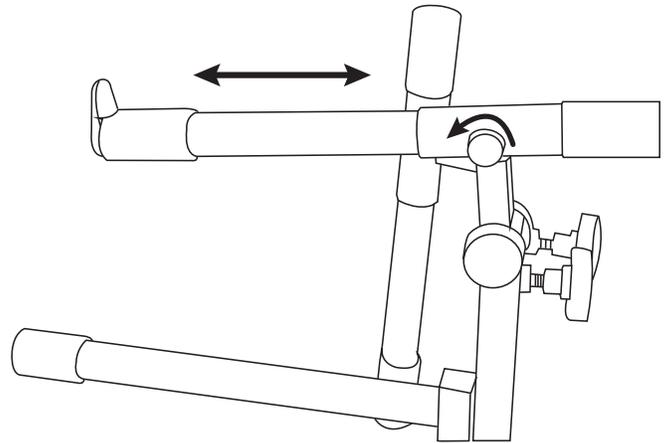

3. Adjust position of arms horizontally using small cat's eye knobs on back and bottom of lower arm brackets.
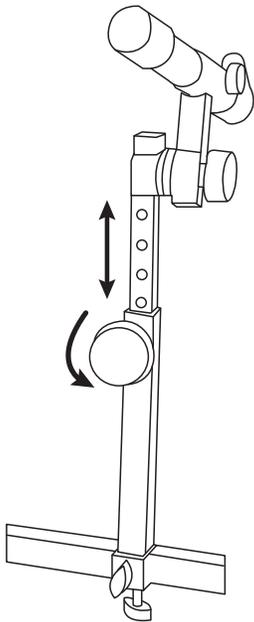

**4.** Adjust the angle of each arm with the posi-lok knob adjustment.

5. Adjust depth of arms using small knob adjustment on the side of the arm bracket.

6. Adjust height of arms using knob adjustment.

7. Make sure all knobs are fully tightened before placing any gear on the KSA8500. Finished product should look like the figure below.

Note: Outer arms can be moved to the inner portion of the stand if dissasembled
