

RS7705

Pro Tiltback Amplifier Stand

BACK/AMP/MIXER STANDS & ACCESSORIES

FEATURES AND BENEFITS

The strength and versatility of this stand comes from the double clutch disk that allows you to remove and rotate the support arm assembly. The solid steel double stamped 3" disk allows for a secure locking position every time! The A-Frame base with 1" square tubing construction will adjust its floor spread in order for you to get the most support under your amp. Ridged end caps keep all metal surfaces off of the ground and act as a shock absorber.

Strength
and
Versatility!

Solid steel double stamped 3" disks allows for a secure locking position and customized angle adjustments, while the folding support arms saves space for storage and travel.
