

TRIPOD MIC STAND WITH M20 BASE MS9750 | 13128

5/8"-27 solid steel threaded lug with locking washer.

Diecast zinc clutch with 3" grip, provides height adjustment from 39 - 69".

Solid steel machined lug with M20 threading provides an excellent combination of fast assembly and secure connection, while extending thread wear far beyond fine-thread designs.

Folding tripod base with plastic end caps for durability and reduced floor vibrations.

FEATURES AND BENEFITS

This heavy-duty Platinum Series stand is built to last! Heavily built, the zinc diecast leg housing features a solid steel machined lug with M20 threading and locking washer. Allen nuts and bolts in the leg housing allow for tension adjustments. The clutch is designed to act as a brake on the upper shaft, even when loosened, preventing the shaft from crashing down while adjusting height. To aid with precise mic positioning, the upper shaft features an oversized knurled locking washer that keeps any attached mic clip exactly where desired.

On-Stage®

**M20 THREADED
BASES & SHAFTS
OVER 50 COMBINATIONS**

The MS9750 features a threaded M20 base lug that is interchangeable with all On-Stage M20 modular components — bases, shafts, booms and more, putting the power of stage and studio customization in your hands.
