

# 3-Space Foldable Multi-Guitar Rack

GS7361 / 10461

## Features and Benefits

The GS7361 was built for gigs. It features a fold-and-go design to make your night easier. Simply fold the base and the stand packs neatly away with all of your other gear, so you go quickly from the stage to your car, truck, or van with ease. Black EVA rubber on all contact points cradles your guitars and protects their finishes from scratches and wear. Unique spanning dividers can be added or removed for custom configurations, handling 2 acoustics + 1 electric, 1 acoustic + 2 electrics, or 3 electrics. The spanners are fully-padded and keyed for a snug, tight fit. So, go ahead, organize your guitars by type, tunings, or however it suits you.
