

# Guitar String Winder

GSW500 / 10580

## Features and Benefits

Save your wrist from the torture of winding fresh strings. The GSW500 has all the features you'd expect from a standard string winder. Its durable plastic head makes for fast string loosening and tightening. The built-in notch removes acoustic bridge pins without marring the pins or the instrument itself. Works with most guitars, basses, banjos, and stringed folk instruments.

## Specifications

**Application:** Guitar or small folk instrument

**Construction:** Plastic

**Color:** Black
