

Non-Slip Drum Mat

DMA6450 / 12039

Features & Benefits

The DMA6450 prevents bass drums from “creeping” across the floor. It is a lightweight and convenient alternative to heavy, fraying rugs commonly used by drummers to keep their drumsets from moving while playing. Made from durable, non-slip PVC material, its 6' x 4' area provides ample room for a bass drum, snare and other core set components. Convenient nylon carry bag included.

Specifications

Dimensions: 6'x4'
Material: Non-Slip PVC
Color: Black with Green Edges
Includes: Nylon Carry Bag
