

Broadcast Boom Arm

MBS5000 / 12550

Features and Benefits

Our Broadcast Boom Arm is a reliable articulating mic boom for broadcast and webcast that provides quiet, easy positioning even while on-air. Heavy-duty construction ensures strength and durability while two pairs of springs provide appropriate counterbalance for popular broadcast microphones and oversized shockmounts. The pre-installed internal XLR cable simplifies cable management and declutters your studio. Installation is easy with a choice of a removable C-clamp for desktops or a screw-in flange mount for any flat surface.
