

U-Mount Multi-Function Mount

MSA8304 / 12647

AWARD-WINNER

Features and Benefits

Make your mic stand into a Swiss Army Knife of live sound. The MSA uses the exclusive On-Stage u-mount clamp design to attach to any mic stand or other object between .85" and 1.2" in diameter. Once attached, its four standard .625"-27 threaded studs accept just about anything. Add mic clips, booms, goosenecks, camera mounts, accessory trays... anything with .625"-27 threading. It's especially handy when combined with the On-Stage Posi-Lok series of boom devices, allowing for multiple articulating arms off of just one mic stand.
