

ABY Switcher

GSP1000 / 14077

Features and Benefits

Complete with true bypass circuitry, heavy-duty black anodized aluminum housing and slip-resistant rubber base, the On-Stage GSP1000 ABY Switcher gives musicians the ultimate choice between 2 input / 1 output and / or 1 input / 2 output configurations. Run one signal to two separate amps for real-time stereo, pivot to and from two amps for dirty / clean dynamics, run two separate instruments through your effects chain simultaneously or bypass anything from that temperamental boutique effect to your entire pedal board. The possibilities are myriad; the quality assured and the choice is yours.

Specifications

Power Requirement: 9V tip negative (adapter not included)

Power Type: Tip negative

Color: Black

Power Consumption: <20mA

Color: Black
