

13' Tripod Lighting/Mic Stand

LS-MS7620 / 14410

NEW PRODUCT

Features & Benefits

Our multipurpose LS-MS7620 Lighting/Mic Stand mounts lighting, photography accessories, and mics. The included spigot and adapter combine to provide 1/4", 3/8", and 5/8" threading to support a wide range of applications. Height adjustable from 47" to a towering 13', this stand enables precise positioning of overhead mics, cameras, and lights. Air-cushioned telescoping shafts prevent free falls for smooth, secure height adjustments. The sturdy aluminum construction and wide base with nonslip rubber feet work together to deliver stability and balance while preventing skids. The spigot allows vertical or perpendicular mounting, making it easy to place your equipment at just the right angle. For efficient storage and transportation, this lightweight stand contracts to 45".
