

Metal Pop Blocker

ASVSM5-B / 14572

Features and Benefits

Improve the quality of voice recordings with our ASVSM5-B Pop Blocker. This acoustically transparent air-pressure filter inhibits pops and hisses without disrupting vocal tone. The durable metal filter screen provides long-lasting performance and ease of cleaning—no need for replacement filters. The C-clamp at the base quickly and easily attaches the pop blocker to mic-stand shafts while a 13" flexible gooseneck enables stable, precise positioning of the screen between the mic and vocalist.

Specifications

- Screen Diameter:** 5.38"
- Screen Construction:** Metal
- Clamp Style:** C-clamp
- Clamp Opening Adjustment:** Up to 1"
