

# 9V Pedal Power Supply

PS9500 / 14709

## Features and Benefits

The PS9500 Pedal Power Supply enables an effect pedal to be used without a battery. When plugged into a standard electrical outlet, this adapter provides plenty of current to power a wide range of pedals including digital effects. The connector is compatible with the majority of pedal power-input jacks and the horizontally orientated adapter block doesn't obstruct neighboring wall outlets.

## Specifications

**Application:** Standard 9 V power supply to power guitar pedals

**Input:** 100–240 V ac, 50/60 Hz, 0.3 A

**Output:** 9 V dc, 500 mA

**Plug Outer Diameter:** 5.5mm

**Plug Inner Diameter:** 2.1mm
