

# Windscreen for Gooseneck Mics

ASWS30-B / 14721

## Features and Benefits

For cleaner mics and clearer sound, use the ASWS30-B Gooseneck Windscreen. This acoustically transparent filter reduces wind, breath, and plosive noises without compromising audio quality. The foam stretches to snugly cover a gooseneck mic's head, shielding it from dust, debris, and moisture. Compatible with most slim gooseneck mics up to 14mm in diameter, this windscreen fits popular models such as: AKG CK31, CK33, Audio Technica AT857, U857, U859, Audix USB12, Countryman IsoMax 4, Electro-Voice HM-2, Sennheiser ME3EW, Shure MX412, MX418, and more.

## Specifications
