

# Stereo Bluetooth Receiver

BC2000 / 14029

## Features and Benefits

Our BC2000 Stereo Bluetooth Receiver wirelessly connects a Bluetooth audio source, such as a mobile device or computer, to a mixer or powered speaker up to 30' away, eliminating the need for running cables. Two separate receivers with built-in XLR connectors pair with each other to split the incoming stereo signal to two XLR inputs. Its USB-rechargeable battery provides power, so no power cord is needed during use.

## Specifications

**Application:** Bluetooth wireless stereo audio

**Bluetooth Version:** 5.0

**Power:** Rechargeable 3.7 V lithium battery

**Standby Current:** < 50  $\mu$ A

**Working Current:**  $\geq$  30 mA

**Wireless Transmission Range:** 30'

**Sensitivity:** -80 dBm at 0.1% BER

**Signal to Noise Ratio:**  $\geq$  75 dB

**Distortion:**  $\leq$  0.1%

**Battery Life:** 10 hours

**Includes:** (2) pairable stereo Bluetooth receivers / (2) USB charging cables
