

ASWSSM7 / 14918

Features and Benefits

The ASWSSM7 SM7B Replacement Windscreen is a high-quality drop-in replacement or backup windscreen that perfectly fits Shure SM7B and Shure MV7 microphones and requires no modifications or additional fasteners. Its built-in flexible plastic retainer ring is a perfect match of the original, enabling easy pop-off and snap-on interchange or installation without the use of tools or adhesives. Made from high-quality acoustically transparent foam, it acts much like a 360-degree pop filter, improving audio quality by diffusing, absorbing, and redirecting wind, breath, and plosives to reduce noise, pops, and hisses without altering vocal tone. While great for sound, it also fully covers the grill and capsule of your microphone to deflect and catch dust, moisture, and other debris, protecting the mic's finish and delicate internal parts. The classic black color unobtrusively blends into any stage setup, performance space, conference room, podcast set, or recording studio for a professional presentation.

Specifications

Length: 99.25 mm (3.9")

Diameter: 53.36 mm (2.1")

Plastic Ring (Outer): 61.15 mm (2.4")

Plastic Ring (Inner): 48.68 mm (1.9")

Weight: 20 g (0.7 oz.)

Material: Foam

Color: Black
