

ASFSS6-GB

6" Dual-Screen Pop Blocker

MICROPHONE STANDS & ACCESSORIES

FEATURES AND BENEFITS

A new pro-level Split Screen Pop Blocker that removes unwanted "P" and "B" consonants by providing open space between the two screens. The first screen diffuses the air that causes plosive consonants, the open space between the screens disperses air pressure, and the second screen disperses the air and removes remaining plosive consonants. The 11.5" gooseneck is constructed from coated brass which allows for precise positioning of the Pop Blocker between you and your mic.

Professional Design

This sophisticated design removes any air pressure that can build up in hoop style pop filters and is very effective in filtering wind-caused plosives.
