

# Laptop Mount

MSA5000 / 10771

## Features & Benefits

Our Laptop Mount efficiently incorporates laptops, tablets, small mixers, samplers, recorders, and other devices into stage or studio rigs by mounting them onto mic stands, our Quantum Core Column Keyboard Stands, or our Mic Attachment Bars for X-frame keyboard stands. This versatile mount provides height-adjustable access to your gear while conserving valuable desktop space at workstations and eliminating the need for extra stands onstage. Ventilation slots promote air circulation to keep electronics from overheating, while retaining tabs keep devices safely in place.

## Specifications
